Professional Summary

Frontend Developer and Diploma CSE student with hands-on experience building responsive SaaS dashboards, modern landing pages, and real-world web applications using React, Next.js, Tailwind CSS, JavaScript, Firebase, Supabase, and Vercel. Developed and deployed multiple live projects including CRM dashboards, EdTech platforms, and a food delivery application. Passionate about UI/UX, scalable frontend systems, and product-focused development.

Core Skills

Frontend	HTML5, CSS3, JavaScript, React.js, Next.js, Tailwind CSS, Responsive UI/UX
Backend / Database	Firebase, Firestore, Supabase, REST APIs, Cloudflare Workers
Tools / Platforms	GitHub, Vercel, Figma, VS Code, Google Maps API, Postman
Programming	Java, C++, JavaScript
Soft Skills	Presentation, Teamwork, Product Thinking, Debugging, Problem Solving

Projects

Smart Leads Dashboard | Next.js, React, Tailwind CSS

- Built a modern CRM/SaaS dashboard with responsive admin-panel interface and analytics-focused UI.
- Implemented professional dashboard layouts, modern cards, and business workflow design.
- Deployed successfully on Vercel with responsive optimization.

Next Gen Learning Dashboard | Next.js, Supabase, Tailwind CSS

- Developed an EdTech-style dashboard with course management UI and SaaS-inspired design.
- Built responsive layouts, dark-theme interface, and scalable frontend architecture.
- Integrated Supabase-ready backend structure and deployment workflow.

EatLo – Food Delivery Platform | Firebase, JavaScript

- Independently developed a real-world food delivery platform with ordering, checkout, and order tracking.
- Integrated Firebase/Firestore for database management and delivery workflow handling.
- Implemented responsive restaurant listing, customer UI, and location-based delivery logic.

Website Genie Landing Page | React, Tailwind CSS

- Designed a premium AI website generator landing page with modern animations and SaaS UI.
- Created responsive layouts, smooth sections, and optimized frontend structure.

Cyber Raksha | Cybersecurity Awareness Project

- Contributed to a cybersecurity awareness platform for competitions and presentations.
- Achieved State-Level 1st Prize through strong technical presentation and teamwork.

Experience

Founder & Frontend Developer – EatLo Food Delivery Platform

- Managed complete frontend development, Firebase integration, UI/UX planning, and responsive optimization.
- Built real-world workflows including restaurant listing, checkout, order tracking, and customer experience improvements.
- Handled deployment, debugging, feature planning, and product updates independently.

Education

Diploma in Computer Science & Engineering – MSBTE Polytechnic

Currently Studying: 2nd Year / 4th Semester | Expected Completion: 2027

Achievements

- Won 1st Prize in a State-Level Project Competition for Cyber Raksha.
- Selected for a National-Level Hackathon and achieved Top 15 ranking.
- Built and deployed multiple live web applications and SaaS dashboards.
- Recognized for technical presentation and frontend product development.

Certificates & Activities

- Hackathon and Project Competition Participation Certificates
- Cybersecurity and Web Development Learning Certificates
- AI and Technology Workshop Participation
- Technical Presenter & Team Coordinator during competitions
